

SCORE

345. TICKLE

Take 17 people to a river

Ask The17 to approach the river as quietly and stealthily as possible so as not to scare away the trout that may or not be there

Suggest that The17 should avoid casting their shadows upon the face of the water by any means possible

**Describe trout tickling to The17
Ask The17 to tickle the fish with their voices
until the fish are in a trance**

**The17 may tickle the fish for as long as they want or until they feel hungry
The17 may then decide whether they would prefer to catch the fish by swiftly snatching it from the water with their voices or whether they would rather thank the fish for being good sports and say goodbye**
